

Clean Out the Coarse for Finer Turf Quality

RESCUE – an exciting new selective grass herbicide

Syngenta and Scotts Professional are pleased to invite you to the launch of RESCUE, a revolutionary new selective grass herbicide to enhance turf quality across your golf course – including greens, tees, fairways and roughs.

For the first time, golf course managers can now selectively remove unwanted Ryegrass, whilst leaving desirable high quality turf species – without any interruption in play.

You will find out how this incredible new product works, how you can use it on your course and hear the experiences of greenkeepers who have already achieved great success in trials on a variety of heathland, links and parkland courses.

We have arranged a series of launch seminars across the UK, please see overleaf for dates, venues and booking form.

Below is a sample agenda for each seminar event.

09:30	Arrive
09:45–10:00	Introduction – Scotts Professional
10:00–10:45	Clean, effective ryegrass removal – improve your turf quality with RESCUE – Dr Simon Watson, Syngenta Turf and Amenity Technical Manager
10:45–11:05	Tea/coffee and demonstrations
11:05–11:35	RESCUE user trials – the product in practice
11:35–11:55	Tea/coffee and demonstrations
11:55–12:40	The programmed approach introducing iTURF – Scotts Professional
12:40	Lunch and demonstrations
